About Me

Sorosh is a senior software engineer with over 10 years of experience in software development and cloud infrastructure. As an AWS-certified Solutions Architect and with 8+ years of hands-on AWS platform work, he has a strong track record of designing scalable, secure cloud-based systems and delivering platform services that development teams rely on daily.

He is self-driven, takes ownership of problems end-to-end, and thrives in environments where he can independently drive initiatives forward. He collaborates well in cross-functional teams and has a natural ability to align technical solutions with business needs.

Key Skills

AWS

8 year of experience

Serverless Architecture

8 year of experience

CI/CD (Jenkins, Github Actions, CodePipeline)

7 year of experience

Docker

7 year of experience

Ansible

7 year of experience

REST APIs

7 years of experience

Java

10 years of experience

Springboot

7 years of experience

Typescript

5 year of experience

Python

4 year of experience

SQL

7 years of experience

React

3 years of experience

Relevant Project Experience

Senior Software Engineer - Core Cloud DevOps Team

Volvo Group Connected Solutions | 2021 - Present

Delivering core cloud infrastructure platform services to development teams across the organization. Designing and maintaining CI/CD pipeline templates using AWS CloudFormation, CodePipeline, and CodeBuild to standardize delivery workflows. Developing infrastructure as code using AWS CDK constructs to build reusable components and deployment pipelines. Administering JFrog Artifactory for security scanning and license auditing. Collaborating directly with the AWS CodeStar team to troubleshoot platform-level bugs. Supporting multi-stack environments (Java, Python, Node.js) across multiple AWS accounts in a multi-region setup.

Technologies used: AWS CDK, CloudFormation, Jenkins, Github Actions, CodePipeline, CodeBuild, IAM, TypeScript, Java, Python, JFrog Artifactory, Xray and Curation. Administering GitHub Enterprise.

Relevant Project Experience

Senior Software Developer

WirelessCar | 2019 - 2021

Designed and implemented a secure platform for creating and issuing digital vehicle keys for Volkswagen. Developed back-end services using Java and Python on AWS Lambda, CloudHSM, and KMS with IAM-based access control.

Also built a car-sharing system enabling VW to run a carpool service. Integrated systems across multiple AWS accounts using EventBridge, SNS, and SQS. Designed single-table DynamoDB databases. And then, implemented a management system for distributing software updates, configuration settings, and encryption keys to vehicles. Automated processes using Bash, Python, Docker, and Ansible.

Technologies used: Java, Python, AWS Lambda, Step Functions, EventBridge, DynamoDB, SNS, SQS, KMS, CloudHSM, Docker, Ansible

Software Developer

Volvofinans Bank | 2016 - 2019

Built a Spring Boot application integrating Dynafleet and banking services to give corporate customers full control over vehicle costs. Also, Implemented GDPR compliance in the internet bank, integrating with BankID, the accounting system, and account services using JMS and XML. Required cross-team coordination in an orchestrated microservice system. Another project I was involved in the assignment was developed a loan/leasing calculation application for Volvo dealers using Reactive Spring, integrated with the bank's scoring system for real-time responses.

Technologies used: Java, Spring Boot, Reactive Spring, JMS, XML, BankID, SQL

Android Developer

Volvo Trucks | 2015 - 2016

Developed an Android application to control a vehicle infotainment system via Bluetooth Low Energy. Designed and implemented a secure communication protocol between mobile devices and in-vehicle infotainment systems.

Technologies used: Java, Android, Bluetooth Low Energy

Education

Master of Science in Distributed Systems and Security

Chalmers University of Technology

2012 - 2016

Languages

English

Full professional proficiency

Swedish

Full professional proficiency

Certificates and Awards

AWS Certified Solutions Architect — Amazon Web Services, May 2020

Volvo Innovation Challenge — Selected Application, May 2015
